Detailed Action

1. The amendment filed 13 July 2006 has been received and considered. Claims 1-25 have been presented for examination.

Allowable Subject Matter

2. **Claims 1-25 are allowed.** The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 25:

The prior art of record does not teach or suggest having a “emulation resources mounted on the circuit board, each emulation resource having a network address”, “a resource interface circuit mounted on the circuit board for controlling states of the input signals in response to force commands received as input”, and a “network interface circuit mounted on the circuit board for receiving packets via the network, each packet conveying a destination address and a force command and for providing as input to the resource interface circuit force commands conveyed in each received packet that also conveys a destination address matching a network address of the at least one emulation” in combination with the remaining elements and features of the claimed invention. The prior art of record (US Pub. No. 2003/00741178) discloses a CPU board that provides a network interface, but this board is not mounted directly on the emulation board, and does not communicate with the emulation board through packets containing a destination address and a force command. It is for these reasons that the applicant's invention defines over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such
